Art Unit: 1743

1. Claims 166-207 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 19.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Note that the instant claims have an effective filing date of 11/20/1992.
6. Claims 48-147 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0535242 in view of Sanz.

EP 0535242 teaches a method of forming an array by depositing 0.5 ul droplets form a capillary tip on a micromanipulator (p.6, paragraph 1).

EP 0535242 fails to teach the instantly claimed droplet size.

Sanz teaches a micropipet for dispensing volumes on the order of 1nl.

It would have been obvious to dispense smaller volumes as taught by Sanz in the invention of EP in order to use smaller volumes of reagent in order to minimize sample requirements and/or costs as was known in the art.

7. Claims 146-147 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0063810.

8. EP 0063810 teaches forming an array by moving a dispenser toward the support, contacting the dispenser to the support to leave a very small dot.

9. EP 0063810 fails to teach the transferred volume.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use as small a volume as possible to form the array in order to conserve reagents in order to minimize sample requirements and/or costs as was known in the art.

10. Claims 48-147 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khrapko et al (Chem. Abstract No. 1991:649536) in view of Sanz.

Art Unit: 1743

Khrapko et al teaches a method of forming an array of 100 x100 microdots disposed at 100 um intervals.

Khrapko et al fails to teach the instantly claimed dispensing and droplet size.

Sanz teaches a micropipet for dispensing volumes on the order of 1nl.

11. It would have been obvious to dispense small volumes as taught by Sanz in the invention of Khrapko et al in order to form the microarray and use small volumes of reagent in order to minimize sample requirements and/or costs as was known in the art.

12. Applicant's arguments with respect to claims 48-147 have been considered but are moot in view of the new ground(s) of rejection.

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
